

ENVIRONMENTAL POLICY

What we aim to do:

We reuse and recycle where possible.

We do not produce leaflets or disposable advertising materials.

We offer 10% discount to all clients who travel to Morzine by train.

We switched to Yokohama BluEarth tyres for all our vehicles saving 10% of fuel.

We have solar production energy system at our production kitchen.

We research and consider energy consumption and efficiency of new products and appliances we buy.

We use local, seasonal produce wherever possible.

We use sustainably foraged wild produce including mushrooms and wild garlic from our pasture.

We have strict control of stock management and rotation, minimising food waste.

We prepare all we can from raw ingredients limiting the use of preservatives and unnecessary processing.

We switched to loose leaf Yorkshire Tea to avoid single use plastics found in teabags. We can now compost tea without compromising on the flavour.

We use a water carbonator to make fizzy waters, tonics and soft drinks, reducing both our carbon footprint and plastic waste, we also switched to French supplied gas for ethical reasons.

We make our cleaning products in house using ingredients as environmentally friendly as possible.

We limit the use of harsh chemicals to absolute minimum

We collect, reuse and recycle everything we can. Including, but not limited to: paper, glass, plastics, metal and other household recyclables, batteries, light bulbs, electronics, printer cartridges, etc.

We donate the goods we no longer need.

We boycott single use coffee pods.

We reuse preloved uniform, clothing and fabrics, donating items that are surplus to our requirements.

We always try to fix things before replacing them.

We grow lots of our own fruit and vegetables including all herbs, apples and plums come from our orchard

We don't agree with cruelty in farming and for this reason we avoid Foie Gras and Veal.

We buy and use ethically farmed eggs and chickens

We boycott Bluefin Tuna and only serve sustainable fish and seafood.

We accept that every new item we buy comes with cost to both environment and human welfare.

We keep that in mind when we make any purchase, big or small. We always try to buy preloved/fair-trade/eco-friendly/ethically and responsibly sourced products to limit our impact.

We buy local produce and goods wherever possible, and use local services to reduce our emissions and support the community we are part of.

We support charities that are close to our hearts both physically and financially including Refugee Community Kitchen, Oxfam, Montagne Vert and Medecins sans Frontieres

We work with suppliers, contractors and clients to improve their environmental performance.

We are always open to discussion to further improve our impact on our planet.

Thanks for reading,

Toby and Tamara
